Business address: The University of Texas at Austin
University Station, Box X, Austin, Texas, USA 78713-8924
Telephone: Cell: (512) 210-6608; Office: (512) 232-8068
E-mail: farzam.javadpour@beg.utexas.edu

CV HIGHLIGHTS

Research & management

- Studies transport in nanoporous materials and permeability models for shale gas/tight oil reservoirs
- PI, Led international research groups to study nanoparticles transport in porous media (2009-16)
- Co-PI, Mudrock/shale Systems Research Laboratory (MSRL) consortium with >30 sponsors (2010-)
- PI and Manager of NanoGeosciences Laboratory at University of Texas-Austin since 2008

Publication & invited talks

- Published 66 peer-reviewed journal papers and 26 conference proceedings
- First author: 14; Second author after supervised students: 23
- Google Scholar: Documents: 105; Publication citations: 6776; h-index: 35; i10-index: 59
- Publons: Documents: 79; Publication citations: 3339; h-index: 26
- 35 invited talks in leading universities and the research labs of oil and service companies

Supervisor & mentor

- Supervised/mentored 42 researchers, postdoctoral fellows, and graduate students at UT-Austin

Grants

- PI (2018-20): Transport in nanoporous material. Supported by BP Inc. (Fund: \$73.5K)
- PI (2017) Seed grant. Sorption in nanoporous shale. Supported by the Bureau of Economic Geology (Fund: \$40K).
- PI (2009-16): Transport of nanoparticle (NP) in porous media. Supported by the Advanced Energy Consortium (Fund: 3.1% of \$58M).
- PI (2010-13): Novel mathematical model of gas content estimation in shale using canister data. Supported by ConocoPhillips (Fund: \$300K).
- Co-PI (2010-present): Mudrock Systems Research Laboratory (MSRL) consortium. Supported by multiple companies. (Fund: \$14M).

Services

- Technical reviewer of 9 international research funding organizations (DOE, DOE-BES, ACS: USA, NSERC: Canada, Swiss, UK, Poland, Australia, Kazakhstan) and 40 scientific peer-reviewed journals.
- Associate editor of the JCPT (2005-2010) and SPE Journal (2020-)
- Chairman of the JSG school equipment committee with an annual budget of \$750K (2014-15)
- Chaired sessions in SPE, AAPG, and SEG meetings

Awards

Four scientific, three teaching, and two service awards.

Teaching

- Taught undergraduate laboratory sessions at the U of Calgary, 1999-2008
- Taught undergraduate courses and graduate-level courses at the University of Texas-Austin and the University of Calgary, 2003-present

CV-LONG VERSION

EDUCATION

Ph.D., Chemical and Petroleum Engineering, University of Calgary, Canada, 2006

M.Sc., Chemical and Petroleum Engineering, University of Calgary, Canada, 2001

B.Sc. with Honors, Petroleum Engineering, Petroleum University of Technology, Iran, 1992

RESEARCH EXPERIENCE

A. Research Scientist/Reservoir Engineer (2014-present)

Bureau of Economic Geology, Jackson School of Geosciences, The University of Texas at Austin

- Developed an AFM metrology for the first time to measure liquid slip in shale samples.
- Developed a model to study fluid loss during hydraulic fracturing.
- Studied interaction of nanoparticles/polymers and minerals suspended in aqueous and non-aqueous media
- Studied molecular interactions of fluid molecules (H₂O, CO₂, N₂, & HC) and pore walls in organic and inorganic minerals of the shale system
- Developed a mathematical model to determine macroscale parameters from pore and sub-pore physics
- Studied transport of water, gas mixtures, and oil mixtures in nanoporous shale using molecular dynamics (MD) simulation
- Studied water flow in nanoporous shale at mesoscopic scale using Lattice Boltzmann model (LBM)
- Proved that Laplace equation is not valid to relate pore size distribution and capillary pressure at nanoscale.
- Developed image-based digital models to build digital shale realizations based on scanning electron microscope (SEM) images.
- Developed object-based digital models to build digital shale models to study permeability.
- Developed semi-analytical models to study pressure and production decline analysis in a fractured reservoir.
- Studied different processes that affect permeability during depressurization. The processes include; poromechanical effects, desorption effects, and desorption shrinkage effects.

B. Research Associate/Reservoir Engineer (2008-14).

Bureau of Economic Geology, Jackson School of Geosciences, The University of Texas at Austin

- Established and led an unconventional laboratory at UT-Austin to study shale gas systems
- Developed a novel method to estimate lost gas from shale canister data accurately
- Led integrated multiscale research on fluid flow in porous media, e.g., shale gas and tight oil
- Developed new permeability models for the shale gas system
- Used atomic force microscope (AFM) for the first time to detect nanopores in shale samples
- Modified pulse decay permeability analysis to include slip and Knudsen effects
- Designed a new model to determine the optimum refracturing time of shale wells
- Developed new metrology to measure interactive forces of nanoparticles/polymers and brine-oil interface
- Studied the use of nanoparticles to enhance CO₂ storage and sequestration in deep saline aquifers

C. Visiting professor (summer 2009-13 and 2017)

University of Calgary, Canada

Fundamental study of nanoparticle interactions with fluid interfaces using atomic force microscopy (AFM) [Collaboration with Professor Matthias Amrein, Faculty of Medicine].

- Experimental study of nanoparticle transport in microfluidic porous-chips. [Collaboration with Professor Matthias Amrein, Faculty of Medicine and Professor Ayo Jeje, Chemical and Petroleum Engineering].

D. Postdoctoral fellow (2006-08)

National Science and Engineering Research Council of Canada (NSERC), Alberta Research Council, Calgary, Alberta, Canada

- Studied CO₂ injection in geological formations for Enhanced Gas Recovery (EGR). Detailed slim-tube, core flood, 3-D dispersion experiments, and upscale mathematical modeling.
- Studied nanoscale gas flow in shale. Detailed analysis of extensive MICP data and development of gas flow models from first principles.

E. Ph.D. student (2001-06)

University of Calgary, Calgary, Alberta, Canada

- Developed microfluidic models for the study of microparticles transport and retention in porous media.
- Performed atomic force microscopy (AFM) to measure interactive forces between particles and the fibers in fibrous porous media.
- Modified Taylor-Aris dispersion theory for the dispersion of finite-size particles in porous media, including interactive surface forces.
- Teaching assistant: a variety of undergraduate and graduate courses: Transport processes, Naturally fractured reservoirs, chemical engineering process calculations, Separation processes, Properties of solids and fluids, Reservoir engineering.

F. MSc. Student (1999-2001)

University of Calgary, Calgary, Alberta, Canada

- Modified a porous media network model to study isolated bubble movement in saturated porous media (Heavy oil flow).
- Assisted in developing two undergraduate laboratories for the petroleum engineering students; Miscible flow in porous media, Immiscible flow in porous media.
- Laboratory instructor; properties of solids and fluids, miscible flow, immiscible flow.

G. Reservoir engineer (1992-1999)

NIOC, Ahwaz

- Detailed experimental and numerical study of hydrocarbon miscible gas injection in a giant light oil reservoir. The study included:
 - Slim-tube miscibility and core flooding experiments to determine miscibility condition of different hydrocarbon gases and reservoir oil, PVT experiments and data analysis
 - Tuning EOS and performing compositional simulation to model slim-tube and core flood tests.

FUNDED RESEARCH PROJECTS

- A. **Principal Investigator (2019-20): *Transport in nanoporous material***. Supported by BP Inc. (Fund: \$33.5K).
- B. **Principal Investigator (2018-19): *Gas adsorption in nanoporous materials***. Supported by BP Inc. (Fund \$40K).
- C. **Principal Investigator (2017) Seed grant**. Supported by the Bureau of Economic Geology (Fund: \$40K).
- D. **Principal Investigator (2008-present): *Established an unconventional laboratory to study shale gas systems and the application of nanoparticles in reservoir engineering***. Supported by the Jackson School of Geosciences at the UT-Austin (Fund: \$250K). The lab was developed from scratch and has successfully attracted research funds and talented students and researchers. The research results of this lab have been published in peer-reviewed journal papers and conference proceedings. The lab is self-funded, with an average annual expenditure of ~\$200K.
- E. **Principal Investigator (2009-16): *Transport of nanoparticle (NP) in porous media for EOR applications***. Supported by Advanced Energy Consortium (AEC member companies include BP America, Baker Hughes, Halliburton, Marathon, Occidental, Petrobras, Schlumberger, Shell, Total, and BG group) (Fund: 3.1% of \$58.0M funds over seven-year; 2009-16).

In 2009, I was awarded this project as the Principal Investigator (PI) through Advanced Energy Consortium (AEC). AEC sponsoring companies include PETROBRAS (BR), Schlumberger, TOTAL, Statoil, Shell, BP, and BJ Groups. AEC started in 2008 with the mission of using nanotechnology in the upstream oil and gas industry. AEC selects and supports research projects from national and international research centers. Technical members from companies and consultant scientists (TAC members) review the proposals and award selected projects. Through competitive evaluation of the research proposals received from highly recognized research institutions including Harvard University, Rice University, California Institute of Technology (Caltech), Boston University, Northwestern University, and UT-Austin (Chemical engineering and Electrical engineering departments). Each year the TAC committee re-evaluates the projects and decides to continue funding. I am probably the only PI that received the funds for seven successive years. My AEC projects' topics concern the fundamental physics of nanoparticle transport in single-phase and multiphase saturated porous media. Below is a list of individual projects.

08/09–09/10: Micromodel tests & pore-scale modeling of nanoparticle transport in porous media.

(Status: Completed).

10/10–09/11: Interaction of nanoparticles and different minerals in brine. (Status: Completed).

10/11–09/12: Nanoparticle interactions with the oil-brine interface. (Status: Completed).

10/12–11/13: AFM measurement of adsorption rate coefficients of nanoparticles in porous (Status: Completed).

12/13–03/16: Effect of polymer-coated nanoparticles on their adsorption rate constant. Effect of polymer coating on nanoparticle interactions with the oil-brine interface. (Status: Completed).

F. Principal Investigator (2010-13): *Novel mathematical model of gas content estimation in shale using canister data.* ConocoPhillips supported (Fund: \$300K over two and half years; 2010-13). (Status: Completed)

In 2010 ConocoPhillips invited me to develop a rigorous model to evaluate their canister data. We have developed a thorough model currently being used by the COP geologists and petroleum engineers to evaluate their canister data. Canister data is essential data to estimate gas in place in shale formations. We presented two talks at international conferences, and a journal paper is published (*SPE Journal*, 2015).

G. Co-Principal Investigator (2010-present): Mudrock Systems Research Laboratory (MSRL). *Gas and oil production from unconventional shale and tight oil reservoirs.* Supported by a consortium of 29 oil and service companies. Member companies include Anadarko, BP, Centrica, Cenovus, Chesapeake, Cima, Cimarex, Chevron, Concho, ConocoPhillips, Cypress, Devon, Encana, ENI, EOG, EXCO, ExxonMobil, Hess, Husky, Kerogen, Marathon, Murphy, Newfield, Penn West, Penn Virginia, Pioneer, Samson, Shell, Statoil, Talisman, Texas American Resources, The Unconventionals, US EnerCorp, Valence, YPF, Tecpetrol. (Fund: 10% of \$14M funds over 12 years—2010-2020).

In 2010, we started the MSRL consortium to perform research on shale gas. I have done experimental and modeling studies on gas and liquid flow in shale systems due to my contribution to MSRL. Below is a list of individual projects. I lead integrated multiscale research for oil and gas production from the shale system.

01/10–09/10: Apparent permeability of gas in ultra-tight shale systems. (Status: Completed).

10/10–09/11: Fundamentals of two-phase flow in shale system. (Status: Completed).

10/11–09/13: Hydraulic fracturing fluid loss in shale formations, Measurement of liquid slip coefficients using atomic force microscopy (AFM). (Status: Completed).

- 10/12–08/15: Stochastic modeling of gas flow and sorption in shale. (Status: Completed).
- 09/14–08/15: Molecular dynamic study of recoverable hydrocarbon mixture adsorption in shale nanopores. Molecular dynamics study of the liquid slip in organic and inorganic shale nanopores. (Status: Completed).
- 09/15–08/16: Modifying the Laplace equation to determine PSD in MICP analysis of shale (Status: Completed).
- 09/14–08/16: Construction of 3D images from 2D scanning electron microscope (SEM) images of shale samples. (Status: Completed).
- 09/14–08/16: Pore-scale modeling of slip-corrected liquid flow in shale system. (Status: Completed)
- 09/14–08/16: Stochastic liquid permeability model of shale. (Status: Completed)
- 05/16–08/19: Integrated multiscale studies of molecular-to-core scale and core-to-multiwell. (Status: Active)
- 09/15–12/19: Effective medium approximation of pore pressure-dependent shale permeability. (Status: Active)
- 09/16–08/19: Realistic pore geometry network modeling of two-phase flow in shale. (Status: Active)
- 09/16–08/20: A stochastic 2D shale permeability model with geomechanical effects. (Status: Completed)
- 05/16–08/19: Molecular dynamics simulation of two-phase flow in realistic pore network of shale. (Status: Completed)
- 05/16–12/20: Construction of three-dimensional (3D) reservoir model from two-dimensional (2D) outcrop images. (Status: Active)
- 05/17-08/20: Transport of liquid in shale nanopores using Lattice Boltzmann Method (LBM). (Status: Completed)
- 08/19-09/20: Liquid transport in nanopores with rough surfaces. (Status: Completed)
- 07/19–12/20: A semianalytic model of pressure response during hydraulic fracturing of multilayer shale reservoirs. (Status: Active)
- 04/20-08/21: Imbibition tests and relative permeability in shale gas and tight oil. (Status: Active)
- H. Member of Research Team (2008-11): *Pore characterization and permeability of shale gas samples*.** Supported by ExxonMobil and Jackson School of Geosciences (Fund: 15% of \$4.5M fund over three years; 2008-11). (Status: Completed)

The study included detailed work on detecting the pore network in shale gas samples and characterization of the sample with the goal of reserve estimation and production deliverability. We used an atomic force microscope (AFM) for the first time to detect nanopores in shale to validate pores detected by scanning electron microscope (SEM). We also developed gas flow models to modify the concept of Darcy permeability for the shale system. We published a paper based on this study in 2009 that has been cited 1200 times so far.

SUBMITTED RESEARCH PROJECTS

- A. Principal Investigator. US Department of Energy (DOE). **Dewatering Matrix After Hydraulic Fracturing to Improve Oil Production.** (Fund 1.5 M, 2019-22). Rejected.
- B. Principal Investigator. US Department of Energy (DOE). **Customized Fracture-Fluid Chemicals to Minimize Pore Blockage in Bakken, Eagle Ford, and Permian Basins.** (Fund \$1.2M, 2018-21). Rejected.
- C. Principal Investigator. National Academy of Science. Gulf Research Program. **Leakage magnitude and frequency of wellbore cement in abandoned offshore wells.** (Fund \$800K, 2018-21). Rejected.

AWARDS

14. **Best summer instructor**, The University of Calgary, Department of Chemical and Petroleum Engineering, 2017.
13. **"A Peer Apart"** achievement award, Society of Petroleum Engineers (SPE), 2014
12. Jack H. Mayfield, Jr. Fund for **"Excellence in the Geological Sciences,"** 2013
11. Total E&P USA **"Petroleum Faculty Fellowship in Geological Sciences,"** 2013.
10. **"Outstanding Service Award,"** Society of Petroleum Engineers (SPE), awarded for the role of Associate Editor of the SPE-Journal of Canadian Petroleum Technology, 2010
9. **"The Dr. S.M. Farouq Ali Best Paper"** published in SPE-Journal of Canadian Petroleum Technology, 2009
8. **"Achievement Award,"** Conventional Oil and Gas business unit, Alberta Research Council, 2008
7. **"Dr. M. Butler Memorial Best Paper"** presented at the Canadian International Petroleum Conference, 2007
6. Winner of the **"Divisional Award"** Alberta Research Council, 2007
5. **"National Science and Engineering Research Council of Canada (NSERC)"** postdoctoral fellowship, 2006-08.
4. **"Province of Alberta Graduate Fellowship,"** University of Calgary, Canada, for four years, 2001-05
3. Faculty of Graduate Studies **"Scholarship,"** University of Calgary, Canada, 2001-05
2. **"Best student paper"** presented in Purification and Analysis session of the 53rd Canadian Chemical Engineering Conference (CSChE2003), Hamilton, Canada, 2003
1. **"First place"** at the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), "Student Essay Competition," Canada, 2002

INVITED TALKS

35. **China University of Petroleum (East China),** Nanofluids for EOR, Oct. 21, 2020. China, Zoom meeting.
34. **CNPC (PetroChina, Sinopec, Cinooc),** Microflow and leak-off in hydraulic fracturing of shale, Sept. 23, 2020. China, Zoom meeting.
33. **CNOOC Reservoir Engineering Headquarter,** Geological modeling and field development, Beijing, China, Aug. 21, 2019
32. **CNOOC Research Laboratory,** Shale permeability measurements, and analysis, Beijing, China, Aug. 21, 2019.
31. **Daqing Oilfield Production Research Institute,** Fluid flow in shale systems, Daqing, China, Aug. 19, 2019.

30. **International Seminar on EOR 2019**, EOR in low permeability-tight oil reservoirs, Daqing, China, Aug. 18, 2019

SELECTED CONFERENCE PRESENTATIONS

33. *Integrated Multiscale Research of Fluid Flow in Shale: Molecular-to-Core Scales*, AAPG-2018, Salt Lake City, UT, USA, May 21-23, 2018
32. *Integrated multiscale modeling of fluid flow in shale: molecular-to-core scales*, Berkeley University, CA, USA, Aug. 2, 2016
31. *Viscoelasticity of multiphase fluids: future directions*, EGU2016, Vienna, Austria, 17-22 April 2016.
30. *Langmuir Slip-Langmuir Sorption Stochastic Permeability Model of Shale*, 2016 Unconventional Resources Technology Conference (URTeC) in San Antonio, Texas, 1- 3 August 2016.
29. *Modeling coupled surface and diffusion forces for the transport and retention of nanoparticles in porous media*, The 2015 AMMCS-CAIMS Congress, Waterloo, Ontario, Canada, June 7-12, 2015.
28. *Chromatographic separation of produced gas in shale gas reservoirs*, The 6th Multidimensional Chromatography Workshop, Toronto, Canada, January 6-7, 2015
27. *AFM metrology to determine nanoparticle adsorption rate coefficient*, 6th International Conference on Porous Media & Annual Meeting of the International Society for Porous Media, Milwaukee, Wisconsin, USA, May 27-30, 2014
26. *Lost gas in shale gas: new methods*, Hosseini, S., Javadpour, F., Gerald, M.E., 5th International Conference on Porous Media & Annual Meeting of the International Society for Porous Media, Prague, Czech Republic, May 21-24, 2013
25. *Dual-continuum modeling of shale and tight gas reservoirs*, Azom, P., Javadpour, F., SPE Annual Technical Conference and Exhibition, San Antonio, TX, USA, 8-10 October 2012 (presented by P. Azom)

24. *Numerical simulation of shale-gas production: from pore-scale modeling of slip-flow, Knudsen diffusion, and Langmuir desorption to reservoir modeling of compressible fluid*, Shabro, V., Torres-Verdin, C., Javadpour, F., SPE 2011 Americas Unconventional Gas Conference, June 14-16, 2011 (presented by V. Shabro)
23. *Pore-scale modeling of slip flow, Knudsen diffusion, and Langmuir desorption to estimate apparent permeability in shale-gas formations*, Shabro, V., Torres-Verdin, C., Javadpour, F., 52nd SPWLA, May 15-18, 2011 (presented by V. Shabro)
22. *Uncovering nanoscale issues in shale gas systems*, Moravvej, M., Javadpour, F., 45th Geological Society of America (GSA) Annual Meeting, New Orleans, Louisiana, USA, March 27-29, 2011 (presented by M. Moravvej)
21. *Transport of a suspension of oblate spheroidal and spherical microparticles in micromodels representing porous media*; Microfluidic Conference, Toulouse, France, Dec. 8-10, 2010.
20. *Modeling transport, adhesion, and detachment of microparticles in microfluidic models representing porous media*; Institute for Environment, Engineering, Economics, and Applied Mathematics conference, Tenerife, Spain, Nov. 30- Dec. 2, 2010
19. *Atomic Force Microscopy (AFM) of shale rock thin section samples*; Mudrock Systems Research Laboratory (MSRL) consortium, Bureau of Economic Geology, Austin, Texas, June 15, 2010
18. *Nano- and micro-particle transport in porous media II: modeling*; Advanced Energy Consortium (AEC) Workshop, Houston, Texas, March 30, 2010
17. *Nano- and micro-particle transport in porous media I: experiment*; Advanced Energy Consortium (AEC) Workshop, Houston, Texas, March 29, 2010
16. *Apparent permeability in mudrock systems*; Mudrock Systems Research Laboratory (MSRL) consortium, Bureau of Economic Geology, Austin, Texas, January 12, 2010
15. *Modeling of coupled surface & drag forces for the transport & retention of microparticles in porous media*; Multiphysics Conference, Lille, France, December 9–11, 2009
14. *Dispersion of passive and self-propelled micro-and nanoparticles in porous media saturated with single and multiphase fluids*; Advanced Energy Consortium (AEC) mid-year meeting, J. J. Pickle Research Facilities, Austin, Texas, September 2–3, 2009
13. *Diffusive advective gas flow modeling in random nanoporous systems (RNPS) at different Knudsen regimes*; 17th International Conference on Composites or Nano Engineering, Honolulu, Hawaii, July 2009 (presented by V. Shabro)
12. *Modeling gas flow through nanopores of mudrocks*: 2009 AAPG/SEPM Annual Meeting, Denver, Colorado, June 7–10 2009
11. *Mathematical modeling of particles dispersion in porous media*; Nanotech Conference and Expo, Houston, Texas, May 5, 2009
10. *Application of nanotechnology in geosciences (experimental and modeling approaches)*: Department of Geological Sciences, Jackson School of Geosciences, The University of Texas at Austin, Austin, Texas, April 24, 2009
9. *Pore-to-reservoir up-scaling of transport processes: applicable to sand reservoirs, shale systems, and naturally fractured media*; Bureau of Economic Geology Symposium, The University of Texas at Austin, Austin, Texas, February 6, 2009

8. *Sequestration in geological formations: pore-level to reservoir-scale up-scaling*: presented at 7th North American Workshop on Applications of Physics of Porous Media, Puerto Vallarta, Mexico, November 2–6, 2007
7. *Carbon dioxide flooding of depleted oil and gas pools*; Greenhouse Gases Mitigation and Utilization Conference, Kingston, Ontario, July 2007
6. *New generation of micromodels and image analysis for the study of dispersion in porous media*: presented at the Canadian International Petroleum Conference, Calgary, Alberta, June 2007
5. *Nanoscale gas flow in shale sediments*: presented at NanoForum Canada 2007, Canada Nanoscience and Nanotechnology Forum, University of Waterloo, Waterloo, Ontario, June 18–20 2007
4. *Dispersion and adhesion of finite-sized particles in fibrous porous beds used as blood filters*: presented at 17th Canadian Symposium on Fluid Dynamics CAIMS-MITACS 2006 Joint Annual Conference, York University, Toronto, Ontario, June 16–20 2006
3. *Experiments on bubble expansion in porous media*: presented at 52nd Canadian Chemical Engineering Conference (CSChE 2002), Vancouver, British Columbia, October 2002
2. *Suspension filtration in porous media*: presented at 52nd Canadian Chemical Engineering Conference (CSChE 2002), Vancouver, British Columbia, October 2002
1. *Network modeling of gas bubble break-up in heavy oil*: 51st Canadian Chemical Engineering Conference (CSChE 2001), Halifax, Nova Scotia, October 13–17, 2001

SUPERVISORY EXPERIENCE (Graduate students, postdocs & research staff)

1. Mr. Vahid Shabro, Member of Ph.D. dissertation advisory committee and member of the Ph.D. defense committee, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2009-13) (Dissertation topic: *Pore-scale modeling of the gas flow in shale gas*). Graduated and currently employed by *BP-America*.
2. Ms. Simin Sajjadi, Co-supervisor, MSc. student, Department of Chemical and Petroleum Engineering, University of Calgary, Calgary, AB, Canada (2010-13) (Thesis topic: *Study of nanoparticle transport in porous microchips*) Graduated and currently employed by *Exxon-Mobil*, Canada.
3. Mr. Mohammad Moravvej, Supervisor, Full-time researcher in my lab (2010-11) (Research topic: *Shale gas characterization using AFM*). Currently Ph.D. student at the *University of Chicago*.
4. Dr. Zahra Mohammadi, Supervisor, a postdoctoral fellow in my lab (2011-13) (Research topic: *Nanoparticle transport and retention in porous media*). Currently works in the oil and gas industry, Houston, USA.
5. Mr. Hamed Darabi, Mentor, Ph.D. candidate, Petroleum and Geosystems Engineering, UT-Austin (2011-2012) (Research topic: *Gas flow in ultra-tight shale*). Currently Analyst, Innovation Group, QRI, Houston, USA
6. Mr. Amin Etehadtavakkol, Mentor, Ph.D. candidate, Petroleum and Geosystems Engineering, UT-Austin (2011-2012) (Research topic: *Gas flow in ultra-tight shale*). Later became a postdoc in my group and currently an assistant professor at Texas Tech U., USA

7. Mr. Harpreet Singh (*Recipient of SPE Star Scholarship and fellowship*), Mentor, Ph.D. candidate, Petroleum and Geosystems Engineering, UT-Austin (2011-2012) (Research topic: *Nonempirical permeability model for shale system; Upscaling nanoparticle transport in the reservoir*). Later he worked as a postdoctoral fellow in my group and currently works as a consultant in Houston, TX, USA).
8. Mr. S. Mehran Hosseini, Mentor, MSc student, Civil Engineering, UT-Austin (2012-2013) (Research topic: *A seismic based reservoir characterization model*). Currently Ph.D. student at the University of Southern California, USA
9. Mr. Shayan Tavassoli, Mentor, Ph.D. candidate, Petroleum and Geosystems Engineering, UT-Austin (2012-2013) (Research topic: *Selection of wells and optimized time of refracturing*). Currently Research Associate at the UT-Austin.
10. Mr. Wei Wu, Mentor, Ph.D. student, Petroleum and Geosystems Engineering, UT-Austin (2012-2013) (Research topic: *Simulation of fracture interference in stimulated shale reservoir*)
11. Dr. Amir Hosseini, Supervisor, a postdoctoral fellow in my lab (2012-16) (Research topic: *Pore-to-grid upscaling using generalized moment analysis*). Currently Senior Technology Development Engineer at *Infinera*, San Francisco, USA
12. Dr. Rouzbeh Ghanbarnezhad, Supervisor, research fellow in my lab (2012-13) (Research topic: *Numerical analysis of gas diffusion in shale-gas systems*). Currently Associate Professor at the *U of Oklahoma*.
13. Dr. Seyyed A. Hosseini, Supervisor, Research fellow in my lab (2012-14) (Research topic: *Analytical models of gas evolution in shale gas canisters*). Currently Research Scientist at the *UT-Austin*.
14. Mr. Seyed Reza Etminan, Supervisor, visiting Ph.D. student from the University of Calgary, Canada (2012-13) (Research topic: *Development of a new experimental technique to measure diffusion in kerogenic material of shales*). Currently Research Scientist at the *Alberta Innovates*, Canada.
15. Mr. Francis Appiah, Supervisor, Visiting MSc. Student from Texas A & M, (2012-13) (Research topic: *Liquid permeability of shale system*). Currently Reservoir Engineer at *Chevron Oil Co.*, USA.
16. Mr. Ayaz Mehmani, Mentor, Ph.D. candidate, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2012-14) (Research topic: *Network modeling of the gas flow in shales*)
17. Mr. Amin Forootan, Supervisor, summer student from Texas A & M (summer 2012) (Research topic: *Numerical simulation of fluid flow in porous microchips*).
18. Ms. Mandana Ashouri, Supervisor, MSc student, chemical engineering (UT-Austin), 2012 (Research topic: *Interactive forces between fluid molecules and kerogen in shales*). Currently Technology Analyst at the Office of Technology Commercialization, *Colorado Schol of Mines*, USA.
19. Mr. Michael Cronin, Mentor, MSc student, Geosciences (UT-Austin), 2011-14 (Thesis topic: *Pulse decay permeability measurement in shale*). Currently, he works at *Exxon*.
20. Mr. Vivek Swami, Member of MSc advisory committee, Department of Chemical and Petroleum Engineering, University of Calgary, Canada. 2011-13 (Thesis topic: *Transport in shale gas system*). Currently Reservoir Engineer with *Schlumberger*, *India*.

21. Mr. Mohsen Rezaveisi, Mentor, Ph.D. candidate, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2013-15) (Research topic: *Gas Chromatographic separation in shale gas reservoirs*). Currently works in QRI, Houston, USA.
22. Mr. Enes Taha Armutlu, Co-supervisor, MSc. Student, Department of Geological Sciences, the University of Texas at Austin (Supervisor: Dr. William Fisher). 2013-15. (Thesis topic: *Petrophysical analysis of SEM images of shale samples for on-site log calibration*). Currently Geophysicist at Turkish Oil Co., Turkey.
23. Mr. Prateek Kathel, Member of the Ph.D. advisory committee, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2014-15) (Dissertation topic: *Experiments and modeling of wettability alteration in fractured reservoirs*)
24. Mr. Sen Wang, Supervisor, visiting Ph.D. student from the China University of Petroleum. 2014-15. (Research topic: *Molecular dynamic modeling of liquid flow in the shale system*). Currently an associate professor at the East China Petroleum University.
25. Mr. Mohammad Labani, Ph.D. thesis examiner, Curtin University, Australia 2014. (Thesis title: *An investigation into the interrelationship between petrophysical properties of potential gas shale reservoirs from Western Australia*)
26. Mr. Morteza Elahi Naraghi (*Recipient of SPE Star Scholarship and fellowship*), Mentor, Ph.D. candidate, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2013-16) (Research topic: *Stochastic permeability model of shale gas system*)
27. Dr. Pejman Tahmasebi, Supervisor, Reservoir Engineer/Scientist in my group. 2014-16 (Research topic: *3D stochastic characterization of 2D SEM images of shale samples*). Currently an assistant professor at the University of Wyoming.
28. Dr. Ali Afsharpour, Supervisor, Postdoctoral fellow in my group. 2014-17 (Research topic: *Pore-scale flow modeling of tight formations*). He currently works in the oil industry.
29. Dr. Amade Zhu, Supervisor, Postdoctoral fellow in my group. 2016-17 (Research topic: *Statistical analysis of pores and organic patches of shale SEM images*).
30. Mr. Han Jiang, Member of PhD advisory committee, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2016-19) (Dissertation topic: *Shale characterization by different methods; nitrogen sorption, MICP, NMR*)
31. Mr. Mehran Mehrabi, Mentor, Ph.D. student, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2013-16) (Research topic: *Mathematical modeling of gas diffusion in the organic matrix of shale*)
32. Mr. Ali Abouie, Mentor, Ph.D. student, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2013-16) (Research topic: *Numerical analysis of pore size changes during pressurization in MICP tests of shale samples*)
33. Ms. Katherine Ogies, Supervisor, Research fellow in my group, 2016 (Research topic: *Slip length measurements by an atomic force microscope-AFM*)
34. Dr. Behzad Ghanbarian, Supervisor, Postdoctoral fellow in my group. 2016-17 (Research topic: *Upscaling shale permeability*). Currently an assistant professor at Kansas State University.

35. Dr. Morteza Elahi Naraghi, Supervisor, Postdoctoral fellow in my group. 2017 (Research topic: *Stochastic permeability model with geomechanical effects*)
36. Mr. Rui Xu, Member of the Ph.D. advisory committee, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2017-20) (Dissertation topic: Lattice Boltzmann modeling of gas transport in shale)
37. Mr. Ernest Sheng, visiting Ph.D. student. Supervisor, China University of Petroleum (East China). 2017-18. (Research topic: Semianalytical modeling fluid flow in nanoporous material). Currently an assistant professor at the Yangtze University at Wuhan, China.
38. Mr. Tao Zhang, visiting Ph.D. student. Supervisor, China University of Petroleum (Beijing). 2018-19. (Research topic: Lattice Boltzmann Method (LBM) modeling of water flow in nonporous material)
39. Mr. Mehran Mehrabi, Ph.D. student. Supervisor, the University of Texas at Austin. Summer of 2019. (Research topic: Modeling fracture propagation in layered media)
40. Mr. Hong Zuo, visiting Ph.D. student. Supervisor, China Academy of Science (Beijing). 2019-20. (Research topic: Research topic: Lattice Boltzmann method (LBM) modeling of gas and liquid flow in nanopores with rough surfaces)
41. Mr. Andy Wang, Computer science student, UT-Austin. 2019. (Research topic: the use of machine learning to detect nanopores in SEM images of shale samples)
42. Mr. Moises Velasco, Member of the Ph.D. advisory committee, Department of Petroleum and Geosystems Engineering, The University of Texas at Austin, Austin, TX, USA (2020-) (Dissertation topic: Tracer analysis of surfactant EOR in fractured reservoirs)

SYNERGISTIC ACTIVITIES

- Associate Editor, SPE Journal, 2020
- Research Proposal Reviewer, NERC Science of Environment, UK, 2017.
- Research Proposal Reviewer, National Centre of Science and Technology Evaluation, Ministry of Education and Science, Republic of Kazakhstan, 2017.
- Research Proposal Reviewer, Mitacs, Canada, 2017
- Chair, Petroleum Hydrodynamics, BIFD-2017, Seventh International Symposium: Bifurcation and Instabilities in Fluid Dynamics, July 11-14, 2017, The Woodlands, TX, USA
- Research Proposal Reviewer, Department of Energy-Basic Energy Science (DOE-BES), 2017
- *Chair*, 2017 AAPG short courses, Houston, TX, 2017
- *Special session chair*, Petroleum Hydrodynamics—Bifurcation and Instabilities in Fluid Mechanics, The Woodlands, TX, 2017
- *Research Proposal Reviewer*, Swiss National Science Foundation (SNF), Switzerland, 2015
- *Chair*, Equipment Committee, Jackson School of Geosciences, (The committee includes six professor and scientist members with \$750K annual budget), 2013-15
- *Research Proposal Reviewer*, National Science Center, Poland, 2014-18
- *Member of Equipment committee*, Jackson School of Geosciences, UT-Austin, 2011-13
- *Reviewed 37* postdoctoral applications for the JSG postdoc fellowship, April 2013

- *Research Proposal Reviewer*, Discovery Grant, National Science and Engineering Research Council of Canada (NSERC), 2012-present
- *Chair*, Advances on Unconventional Gas Resources Session, SPE-CSUG_Canadian Unconventional Resources Conference, Calgary, AB, Canada, November 15-17, 2011
- *Associate Editor*, SPE-Journal of Canadian Petroleum Technology, 2010- present
- *Chair*, Theme Session: Nanogeosciences in Mudrocks and Shale Gas Strata, Geological Society of America Annual Meeting, New Orleans, March 28–29, 2011
- *Research Proposal Reviewer*, Grant proposal for shale gas and microfluidic topics; ACS Petroleum Research Fund, 2010-18
- *Organizer*, Peer-reviewed paper writing workshop, Bureau of Economic Geology, UT-Austin, March 11, 2011
- *Co-chair*, Pore Network and Fluid Flow in Mudrocks/shale gas, 2009 Annual American Association of Petroleum Geologists (AAPG) Convention, Denver, Colorado, 2009
- *Interviewed* three faculty applicants for the Department of Geological Sciences, UT-Austin, 2009
- *Interviewed* 14 researchers and 18 postdoctoral applicants for the Bureau of Economic Geology, UT-Austin, 2009-2015
- *Reviewed* 45 postdoctoral application for the JSG postdoc fellowship, 2011
- *Issue coordinator*, SPE-Journal of Canadian Petroleum Technology, 2006-13
- *Coordinator*, International Graduate Student Paper Competition, CSChE 2005 Conference, Calgary, Alberta, Canada, 2005
- *Co-chair*, Reservoir Simulation Session, Canadian International Petroleum Conference, 2004-05
- *Scientific Secretary*, World Petroleum Conference, Calgary, Alberta, Canada, 2000

TEACHING EXPERIENCE

(1999-present)

- Developed and taught two graduate courses at UT-Austin (USA).
- Taught graduate courses at the U of Calgary (Canada)
- Taught an undergraduate course with its associated labs to second-year engineering students at the U of Calgary for seven successive years
- Developed two labs for the senior undergraduate petroleum engineering students at the U of Calgary
- Instructor of numerous undergraduate labs at the U of Calgary
- Teaching assistant of many undergraduate and graduate courses at the U of Calgary

A. Lecturer, Graduate courses (2010-present)

Department of Petroleum and Geosystems Engineering and Department of Geological Sciences, UT-Austin, USA (2010-present)

Department of Chemical and Petroleum Engineering, University of Calgary, Canada, (2011-17)

- Developed and taught a graduate-level course titled '**Advances in Unconventional Shale Gas Resources.**' 259 students took this course so far. In this course, students learn about the differences between conventional and unconventional reservoirs. New techniques such as SEM and AFM to characterize pores in shale samples, sorption, and geochemistry, some aspects of geomechanics and well logging are included in the course material. Fluid flow modeling is emphasized in this course.

- 2020 (fall): UT-Austin, Enrollment: 19 (15 graduate and 4 senior undergraduate students). Overall instructor rating (4.5/5.0).
- 2019 (fall): UT-Austin, Enrollment: 28 (15 graduate and 13 senior undergraduate students). Overall instructor rating (4.8/5.0).
- 2017 (fall): UT-Austin, Enrollment: 26 (18 graduate and 8 senior undergraduate students). Overall instructor rating (4.3/5.0).
- 2017 (summer): U of Calgary (Canada), Enrollment: 13 (graduate students). Excellent. Awarded the best summer instructor.
- 2016 (fall): UT-Austin, Enrollment: 18 (14 graduate and 4 senior undergraduate students). Overall instructor rating (3.7/5.0).
- 2015 (fall): UT-Austin, Enrollment: 39 (29 graduate and 10 senior undergraduate students). Overall instructor rating (4.2/5.0).
- 2014 (fall): UT-Austin, Enrollment: 28 (19 graduate and 9 senior undergraduate students). Overall instructor rating (4.1/5.0).
- 2013 (fall): UT-Austin, Enrollment: 21 (graduate students). Overall instructor rating (4.2/5.0).
- 2012 (summer): U of Calgary (Canada), Enrollment: 37 (graduate students). Overall instructor rating (Excellent).
- 2012 (fall): UT-Austin, Enrollment: 17 (graduate students). Overall instructor rating (4.4/5.0).
- 2011 (summer): U of Calgary (Canada), Enrollment: 16 (graduate students). Overall instructor rating (Excellent).
- 2011 (fall): UT-Austin, Enrollment: 14 (graduate students). Overall instructor rating (4.6/5.0).
- 2011 (fall): UT-Austin, Enrollment: 15 (undergraduate students). Overall instructor rating (4.7/5.0).
- 2010 (fall): UT-Austin, Enrollment: 5 (graduate students). Overall instructor rating (4.3/5.0).
- Developed and co-taught a graduate-level course titled '**Advances in CO₂ Injection and Storage in Geological Formations**'.
 - 2011 (fall): UT-Austin, Enrollment: 8 (graduate students). Overall instructor rating (N/A).
 - 2010 (fall): UT-Austin, Enrollment: 6 (graduate students). Overall instructor rating (5.0/5.0).
- Developed a graduate-level course titled '**Continuum and Discrete Transport Processes**.' To be taught.

B. Lecturer, Undergraduate courses (2003-10)

Department of Chemical and Petroleum Engineering, University of Calgary, Canada

- Taught undergraduate-level course titled '**Properties of Solids and Fluids and its associated labs**.' More than 150 undergraduate students enrolled in this course. Instructor ratings were **higher than average department ratings**.
 - 2010 (summer): U of Calgary (Canada), Enrollment: 27.
 - 2009 (summer): U of Calgary (Canada), Enrollment: 22.
 - 2007 (summer): U of Calgary (Canada), Enrollment: 29.
 - 2006 (summer): U of Calgary (Canada), Enrollment: 21.
 - 2005 (summer): U of Calgary (Canada), Enrollment: 30.
 - 2004 (summer): U of Calgary (Canada), Enrollment: 20.
 - 2003 (summer): U of Calgary (Canada), Enrollment: 18.

C. Short course Instructor (2008-19)

- 06/30-07/06/2019: China University of Petroleum, East China, Qingdao, China. Enrollment: 120. Unconventional Resources and Their Development History in the US.
- 05/19/2019: AAPG Conference, San Antonio, TX. Enrollment: 38. Title: Essentials for Understanding Unconventional Mudrock Plays.
- 01/17/2017: Statoil, Austin, TX. Enrollment: 22. Title: *Gas storage and production in shale reservoirs*.
- 12/4/2012: McCombs School of Business, the University of Texas at Austin. Enrollment: 35. Title: *The Key Exploration and Development Technology of Low Permeability and Extra-low Permeability Oil Reservoir*.
- 11/8/2012: McCombs School of Business, the University of Texas at Austin. Enrollment: 40. Title: *Reserve and Deliverability Estimation in Shale Gas Reservoir*.
- 3/12-16/2012: PetroChina Research Laboratory, Beijing, China. Enrollment: 50. Title: *Fundamentals of shale gas production*.
- 11/20/2008: BEG, Houston, Texas. Enrollment: 150. Title: *Questions, answers, and challenges in shale gas/mudrock systems research: technologies and applications for shale reservoir successions*. (co-instructed)
- 9/10-11/2008: Hongzhu, China. Enrollment: 110. Title: *CO₂ injection in geological formations*.
- 9/8-9/2008: Hongzhu, China. Enrollment: 90. Title: *Heavy oil recovery*.
- 6/10-12/2008: CNPC Petroleum Center, Changchun, China. Enrollment: 150. Title: *Gas shale reservoir characterization*.

D. Lab instructor, (1999-2006) Undergraduate labs associated with courses Department of Chemical and Petroleum Engineering, University of Calgary, Canada,

- Developed two undergraduate labs and instructed many labs
 - **Miscible flow lab.** I helped to establish this lab for the 4th-year undergraduate students in the petroleum engineering program. The lab is a part of the curriculum at the U of Calgary. I have instructed this lab for a few semesters.
 - **Immiscible flow lab.** I helped to develop this lab for the 4th-year undergraduate students in the petroleum engineering program. The lab is a part of the curriculum at the U of Calgary. I have instructed this lab for a few semesters.
 - Thermodynamics lab
 - Heat transfer lab
 - Properties of solids and fluids lab
 - Fluid mechanics lab
 - Separation process lab
 - Fluid flow in porous media lab

E. Teaching assistant (1999-2006) Graduate and undergraduate courses Department of Chemical and Petroleum Engineering, University of Calgary, Canada, Teaching assistant of numerous undergraduate and graduate courses (1999-2006).

- Numerical analysis
- Separation processes
- Reservoir Engineering
- Well testing
- Fractured reservoir (graduate level)
- Transport processes
- Chemical engineering process calculations
- Properties of solids and fluids

ATTENDED WORKSHOPS AND TRAINING

- *Modern Well Test Analysis*, Stanford U., Palo Alto, CA, August 18-20, 2014
- *Understanding Well Performance and Optimizing Completions in the Bakken*, San Diego, CA, USA, December 10-12, 2013
- *Shale PVT and sampling*, SPE, Houston, TX, USA, Nov. 4, 2012
- *Shale oil and tight oil fundamentals*, SPE, San Antonio, TX, USA, Oct. 7, 2012
- *Eagle Ford shale*, SPE Applied Technology Workshop, Austin, TX, USA, 2011
- *Business writing, Continuing & Innovation Education*, The University of Texas at Austin, Nov. 18, 2010
- *Clear & confident speech*, Continuing & Innovation Education, The University of Texas at Austin, November 16, 2010
- *Organic facies, maturity & 3D modeling in unconventional*, American Association of Petroleum Geologists (AAPG), Houston, TX, October 7-8, 2010
- *Log analysis of shaly sands*, American Association of Petroleum Geologists (AAPG), Houston, TX, October 6, 2010
- *Reservoir characterization & production properties of gas shales*, American Association of Petroleum Geologists (AAPG), Houston, TX, October 4-5, 2010
- *Basics for completions, stimulations and production operations in gas shales*, Society of Petroleum Engineers (SPE), Houston, TX, May 11-12, 2010
- *Project management*, Alberta Research Council, Calgary, Canada, five-day workshop, 2007
- *Hydraulic fracturing*, Schlumberger, Calgary, Canada, May 7-8, 2007

PROFESSIONAL SOCIETIES

- Society of Petroleum Engineers (SPE), 1990-
- American Institute of Chemical Engineers (AIChE), 2016-
- American Association of Petroleum Geologists (AAPG), 2014-
- American Geophysical Union (AGU), 2015-
- Adhesion Society, 2005-2008
- Canadian Institute of Mining and Metallurgy (CIM), 1990-2010
- International Society for Porous Media (InterPore), 2012-
- Society of Core Analysts (SCA), 2007-2010

HOBBIES

Playing with my kids; Sports: tennis, soccer, hiking; Music; watching movies and news.
