RESEARCH FUNDING

Sponsored Research Funding -- Candidate PI/ co-PI/ co-I

Current:

Sponsor: National Science Foundation (NSF); Award #: 2036549

Project Title: [CAREER: Mi Raza, Mi Lengua, Mis Matemáticas: Latinx Students' Counter-stories as Doers-of-Mathematics](#)

Funding period: 2020-2025

Principal Investigator: Gómez Marchant, C. N.

Role and contribution: In this project, I am conducting a longitudinal ethnographic study focusing on 8 to 12 upper elementary Latinx students as they transition from elementary to middle school mathematics learning environments. The project begins

(year 1) with emerging ourselves in the community through the completion of an oral history project with the Latinx communities in the school district.
Total funding: \$1,021,186

Sponsor: Spencer Foundation

Project Title: STEM en Familia: Latine Families Community Cultural Wealth during STEM Activities

Funding period: 2023-2025

Principal Investigator: Gómez Marchant, C. N.

Role and contribution of candidate: This research project seeks a deeper understanding of how Latine caregivers evoke their cultural community wealth (Yosso, 2005) while engaging in and facilitating STEM problem-solving activities. This two-year project will position caregivers as the experts of working with their child(ren). The overarching research question for this study is: What languaging practices and community cultural wealth do Latine caregivers enact while facilitating STEM tasks?

Total funding requested: \$50,000

Sponsor: National Science Foundation (NSF); Award #: 2313609

Project Title: [RAPID: Mathematics Within the Tapestry of Civic Engagement](#)

Funding period: 2023-2025

Principal Investigator: Gómez Marchant, C. N.

Co-Principal Investigator: Gargroetzi, E. C.

Role and contribution: This research project characterizes and analyzes the developing mathematical discourses embedded within the civic engagement of a predominantly Latinx community in the aftermath of school closures and the ensuing 2023 Texas legislative session. The overarching research question for this study is: What mathematical ideas are used by school district personnel and community members during discussions of school closures and promotion of further engagement with the Texas legislative session? To answer this question, this study focuses on the mathematical discourses emerging as a result of school closures and the organizing done by local advocates (community leaders, Parent-Teacher Organizations).

Total funding: \$199,994

Sponsor: National Science Foundation

Project Title: [Co-Constructing a Research Program Through Community Dialogues about Mathematical Storylines](#)

Funding period: 2024-2025

Principal Investigator: Gómez Marchant, C. N.

Role and contribution of candidate: This Partnership Development proposal in the Teaching strand will expand existing relationships between the researcher and an elementary school community in central Texas. We have worked together over the last two years in learning more about the experiences of Latiné learners in mathematics. We see this partnership development opportunity to further knit the threads of interest of the collective community. School leadership has expressed interest in enhancing the teaching of upper elementary mathematics through better developing relationships with the greater community. The administration recognizes

how Latiné and other language minoritized groups have increased in the area and the need for multilingual pedagogies in mathematics.
Total funding: \$100,000

Internal Research Funding -- Candidate PI/ co-PI/ co-I

- June 2019 – May 2020 – Clemson University Provost Infrastructure Award (**\$17K Award; Total UT Award Amount: 0**), *Construction of Learning Spaces Emphasizing Student Thinking and Collaboration* (PI: C. N. Gomez Marchant, CO-PI: L. Martin) This internal grant at Clemson University funds the redesign of classroom spaces to help researchers/instructors in accomplishing their research agenda. Our goals was construct a classroom based on the thinking classroom model to study how the model influences prospective mathematics teachers' conceptualization of teaching and learning mathematics.
- August 2018 – May 2019 – Clemson University Associate Dean of Research Research Award (**\$17K; Total UT Award Amount: 0**), *Elementary Latinx Students' Accounts of Learning Mathematics* (EL ALMa) (PI: C. N. Gomez Marchant). This research project focused on upper elementary Latinx learners' testimonios about learning and doing mathematics. We examined the intersections of mathematics, race, and language in their experiences at predominantly white schools. This project was a pilot that informed the Mi3 project (NSF CAREER above).
- August 2017 – May 2018 – Clemson University Associate Dean of Research Research Award (**\$6000; Total UT Award Amount: 0**), *Supporting Secondary Mathematics Teachers' Argumentation* (PI: C. N. Gomez Marchant) This research grant funded a study on a professional development experience for middle grades mathematics teachers focused on the facilitation of mathematical argumentation. The investigation focused on how the teachers' beliefs about argumentation changed over time and how they self-evaluated their own discourse practices.
