Marsh, A.D.*, Parker, W.G., Stockli, D.F. and Martz, J.W., 2019. Regional correlation of the Sonsela Member (Upper Triassic Chinle Formation) and detrital U-Pb zircon data from the Sonsela Sandstone bed near the Sonsela Buttes, northeastern Arizona, USA, support the presence of a distributive fluviatile system. Geosphere.

Xu, J.*, Stockli, D.F., Snedden, J.W., 2017 Enhanced provenance interpretation using combined U–Pb and (U–Th)/He double dating of detrital zircon grains from lower Miocene strata, proximal Gulf of

Powell, J., Schneider, D., Stockli, D.F., and Fallas, K., 2016, Zircon (U-Th)/He thermochronology of Neoproterozoic strata from the Mackenzie Mountains, Canada: Implications for the Phanerozoic exhumation and deformation history of the northern Canadian Cordillera. Tectonics.

Pujols, E.*, Stockli, D.F., Bosworth, W., Zircon (U-Th)/He detrital constraints on the pre- and syn-rift tectonic evolution of the central Gulf of Suez, Egypt. Tectonics.
